ANNUAL STATEMENT OF

FOREIGN TRADE OF THAILAND

B.E. 2499
(1956)

DEPARTMENT OF CUSTOMS

INTRODUCTION

The annual statement of the Foreign Trade of Thailand for the year B.E.2499 (1956) has been compiled and published by the Statistics Division of the Department of Customs.

The most useful feathers of the previous annual statement such as detailed classification of commodity items shown in seven digits codes, minor totals of sections of commodities tabulated in table 3 and 4, explanatory notes and separate tables for direct-transit trade are also retained.

In addition to the above mentioned items, total value of Imports and Exports classified by customs districts and by detailed customs ports are included in order to summarize the flow of foreign trade in the provincial ports. To provide more informations for the users of the annual statement, Summary Table of the Annual Shipping and Summary Table of Commodity Figures (by sections) presented in five consecutive years are also added.

The Department extends sincere gratefulness to all who have co-operated with the publications as well as to the users who may bring to the Department's attention apparent discrepancies and inconsistencies in the reports so that future annual statements could be perfected. Suggestions on shortage of commodity items and classifications are also welcomed.

EXPLANATORY NOTES

System of Recording

The Foreign Trade Statistics of Thailand include all merchandise imported into or exported from Thailand without regards to whether the intention at the time of importation is for home consumption or for re-export, and whether or not the exports and re-exports are from customs bonded warehouse or from customs clearance importation. This system is known as the "General" system of recording trade statistics. Separate tables are compiled for exports of the produce and manufactures of Thailand and for exports of imported merchandise (re-exports), as well as direct transit trade.

Definition

For the purpose of compiling these statistics the following definitions have been observed:-

1. Imports record all goods which enter Thailand and are cleared by customs officials inclusive of all goods placed in customs bonded warehouse, but exclusive of goods awaiting for customs clearance in the warehouses. No distinction is made between imports for home consumption and imports for re-exports.

2. Exports record both goods wholly produced in Thailand and goods previously included in statistics of imports which are changed essentially in form or which are changed in condition so as to increase in value in Thailand other than minor operations such as sorting, cleaning, re-packing or blending.

3. Re-Exports record all goods previously included in statistics of imports which are exported from Thailand in the same condition as when imported. Minor operations such as sorting, cleaning, re-packing or blending do not affect the status of the re-exported goods.

4. Direct Transit record all goods which are brought into the customs limit for the sole purpose of transport to another contracting country. These goods are primarily under customs custody while in Thailand.

Coverage

In these statistics "merchandise" means goods imported and exported by Government, Government Organizations as well as by private enterprises and persons, but excludes:-

1. accompanied personal effects of passengers, for their own private use
2. ship stores and bunker fuels
3. transhipment cargo
4. parcel post, except packages cleared by customs officials

The figures include all importations and exportations by sea, land, air and parcel post.

Classification of Commodities

The classification of commodities has been set out in the "Thailand Customs Nomenclature, third edition revised 1956", which is based on the Standard International Trade Classification.

Period Covered

In general, the compilation is made from the date of duty-paid entry and the date of bonded warehouse entry, filed with respective customs officials during the calendar month and issued in the monthly reports for both imports and exports.

B

Quantity and Weight Units

Quantities and weights are recorded in units in accordance with the "Official Import and Export List", but where goods are required to be entered by weight, net weight excluding packing and containers is used, except in case of certain goods as provided in the Customs Tariff, such as weight of immediate packing.

Some units of quantity and weight need explanation :-

picul	-	60	kilogrammes
corge	-	20	pieces of cut clothing, e.g. sarong

Country

For the purpose of ascertaining the balance of payment, Foreign Trade Statistics of Thailand are compiled as indicated below:-

For Imports Country of purchase is used instead of country of origin as compiled in the previous years. Imports are credited to the country from which goods were purchased into Thailand without any commercial transaction intervening between that country and Thailand and without regards to country of consignment of such goods.

For Exports Country of sale is used for all shipments. Exports are credited to the country where the sale of such goods were made without any commercial transaction intervening. The country of final consumption of that shipment or the country of consignment are of no cousequence

Values

Im general, values are based on the declarations of importers and exporters, and subsequently verified by customs officials.

Imports are compiled from C.I.F. value to the landed port inclusive of packing, commission and all charges as specified in the commercial invoices, approved by the customs officials.

In case of ad-valorem duty and no proper invoice presented by the importer, a value of the goods is secured from assessment by customs valuators as provided in Customs Act. (No. 9) 1939, thus:-

"True market value" or "Value" of any goods shall mean the wholesale cash price (exclusive of duty in the case of imports), for which goods of the like kind and quality are capable of being sold without loss at the time and place of importation or exportation, as the case may be, without any deduction or abatement."

Exports are compiled from F.O.B. value at the Port of departure as declared in the export entry by the exporter. F.O.B. values are drawn from the documents of sale for the actual amount received in term of national currency, including export duty, if any.

Exchange Conversion

Foreign currencies, which have been declared in both import and export entries, are converted into national currency at the median rate of exchange between rate of purchase and rate of selling issued daily by the Bank of Thailand.

Computation of such a value is taken from the monthly notice issued by the Department of Customs, provided that the difference does not exceed 5 per cent from the daily issuance by the Bank of Thailand.

Using multiple currency system, the conversion of foreign exchange into Baht is being obtained by computing the rate of exchange of Pound Sterling in free market value as the basis for other currencies according to Official Parity.

The annual average of the rate of exchange for the year B.E. 2499 (1956) should be Baht 57.37 = Sterling £1, or Baht 20.49 = U.S.$1.00.

Adjustment for the Annual Reports

Certain figures, published in the monthly reports, have been adjusted to the actual value as close as possible. Adjustment in the annual reports consists of the following procedures:-

1. **Where no proper invoices have been filed by the importer, assessment values by customs valuators in "customs deposit entries" for immediate clearance added,**

Baht 85,814,448

2. **Refunds of certain importations for Port of Bangkok are subtracted**

Baht 1,423,288

3. **Refunds of certain exportations for Port of Bangkok are subtracted**

Baht 2,155,230

4. **Actual exports of rice are substituted for the figures already published**

Baht 2,846,944,062

Parcel Post

Postal packages, which have been recorded according to Section 9 of the commodity code, they being not classified according to kind, include each item valued not more than Baht 100. Compilation of parcel post goods over the said value is made in correspondence with their commodity codes.

Special Transactions

Special transactions in Section 9 of the commodity code include diplomatic importation and exportation and goods under foreign aids, where declarations cannot be classified according to any specific items.

Abbreviation

n.e.s. means "not elsewhere specified"
